

THE CLINICAL EXCHANGE

Expert Perspectives on Treating and Managing Patients at High Risk for Fracture

YOU ARE INVITED TO JOIN US FOR A CONTEMPORARY AND CLINICALLY RELEVANT EDUCATIONAL ACTIVITY.

This interactive, case-based program was developed by leading Canadian experts to address the importance of risk assessment, screening and management for all patients at high risk for stress fracture. This program aims to translate scientific and clinical evidence into practical steps and incorporates expert recommendations into practical strategies applicable to primary care practice.

AGENDA

The following modules will be presented:

- ☐ The Clinical Exchange: Expert Perspectives on Treating and Managing Patients at High Risk for Fracture
- ☐ Case 1: Risk Assessment and Management of Treatment Naïve PMO Patients
- ☐ Case 2: Risk Assessment & Management of Male OP Patients
- ☐ Case 3: Medications and Comorbidities Associated with Bone Loss
- ☐ Case 4: Benefits of Treatment Persistence and Adherence
- ☐ Case 5: Optimization of Long-Term Therapy

LEARNING OBJECTIVES

Upon completion of this activity, participants will be able to:

- Perform risk assessments and screening for all patients at high risk for fracture, including all male and female patients who are treatment naïve or currently on therapy
- Translate scientific and clinical evidence into the management and treatment of all high risk patients in primary care practice
- Integrate expert recommendations and practical strategies for future assessment, treatment and management of all patients at high risk for fracture

This one-credit-per-hour Group Learning program has been certified by the College of Family Physicians of Canada and the Chapter for up to Mainpro+ credits.

This program has received an educational grant and in-kind support from Amgen Canada
